SUMMARY

Backend engineer with 6 years building payment infrastructure under PCI scope. Led the migration of a monolith to 12 Python microservices handling 4.2M requests/day, and owns the on-call rotation for 9 services across 3 AWS regions.

SKILLS

Python · PostgreSQL · AWS · Kubernetes · Docker · Terraform · Kafka · Redis · GraphQL · CI/CD

EXPERIENCE

Senior Backend Engineer | Meridian Payments 2021 – Present

- Led migration of a monolithic billing system to 12 Python microservices handling 4.2M requests/day with no customer-visible downtime
- Cut p99 API latency from 840ms to 210ms by introducing Redis caching and rewriting the hot query path, reducing error budget spend by 60%
- Owned the on-call rotation for 9 services across 3 AWS regions, cutting mean time to recovery from 52min to 11min
- Built a Kafka event pipeline processing 1.2M events/day, replacing a nightly batch reconciliation that had run for 6 hours
- Mentored 4 engineers through the promotion cycle; 2 advanced to senior within 18 months
- Shipped a GraphQL gateway fronting 14 REST services, retiring 3 duplicated aggregation layers

Software Engineer | Brightline Labs 2019 – 2021

- Built an internal React analytics dashboard adopted daily by 300 staff, replacing 4 competing spreadsheets
- Authored the CI/CD pipeline in GitHub Actions, reducing deploy time from 40min to 4min and unblocking 2 releases per week
- Redesigned a PostgreSQL schema that had accumulated 2TB of duplication, removing 11 redundant tables
- Raised integration test coverage from 34% to 87% across the 6 services owned by the team

PROJECTS

- Built tapscale, an open source load testing tool for Kafka, now at 1.4k GitHub stars

EDUCATION

B.S. Computer Science | Commonwealth University 2013 – 2017
